

CLOUD READINESS ASSESSMENT

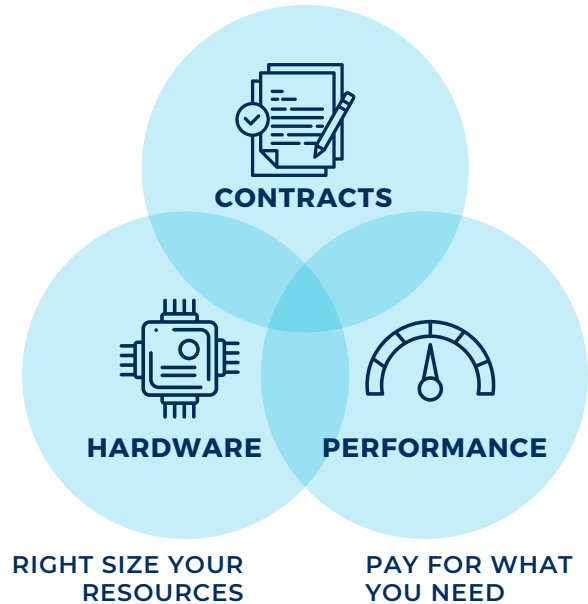

The Cloud Readiness Assessment is just the first step in the customers migration journey. But it's arguably the most important. Because by understanding your costs today, you can achieve savings tomorrow.

WHAT IS THE CLOUD READINESS ASSESSMENT (CRA)?

The CRA enables businesses to assess and optimize current on-premises and cloud environment based on application dependencies, actual resource utilization and third-party licensing.

The third-party licenses cost is on average 3 times the total cost of running these workloads in the AWS cloud. Licensing really matters!

REDUCE COSTS

HOW IT WORKS

STEP 01

DATA COLLECTION

A comprehensive look at the customer's environment and infrastructure, using AWS discovery tools and existing customer data.

STEP 02

PLATFORM PERFORMS ANALYTICS AND CREATES COST MODELS

In-depth analysis of the IT estate with recommendations built from actual compute needs, third-party license understandings, and customer objectives.

STEP 03

RESULTS DECK CREATED

A digestible deck giving customers the full picture of their Cloud Readiness Assessment results.

STEP 04

DRIVE AND ACCELERATE MIGRATIONS WITH XENTEGRA

A targeted migration strategy built from the Cloud Readiness Assessment.
