CYBER EXPOSURE MONITORING FOR THE DARK WEB

Sensitive data leaked on the dark web is one of the worst nightmares for anyone in leadership. Credentials, APIs, financial and business documents, or any amount of technical data can be used to exploit a company. With XenTegra's Cyber Exposure Monitoring (CEM) service, business leaders can rest easy knowing that they have eyes in the deepest parts of the dark web monitoring for leaked information. Whether you have real-time alerting or scheduled reports, XenTegra makes sure you're continuously aware of your external threat exposure, so you stay one step ahead of cybercriminals.

COMPREHENSIVE DATA PROTECTION

XenTegra's CEM service detects numerous types of leaked information using our world-class, global law-enforcement trusted sources. These sources have insights into every corner of the dark web, from open exchange forums to private group exchanges, to give you the utmost confidence in your protection.

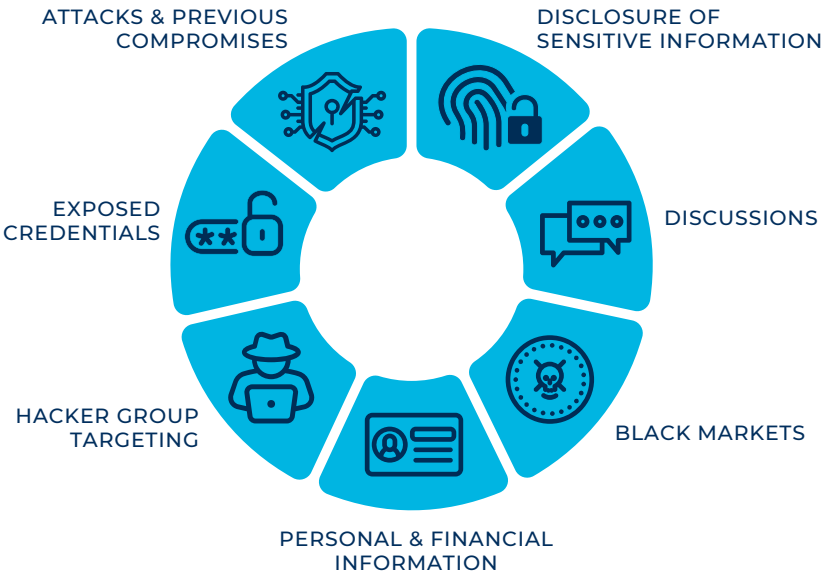
DARK WEB ALERTING AND REPORTING

XenTegra offers several levels of CEM service. From on-demand or recurring reports to continuous real-time alerting, we provide immediately actionable intelligence to enable you to instantly resolve external and internal attack vectors.

XENTEGRA'S CEM SERVICE COVERAGE INCLUDES

- Domain email addresses
- Employee and customer credential
- External IP addresses associated with your company
- Exposed assets
- Exposed vulnerabilities
- Financial records and data
- Targeted attack discussions
- And any other associable data with your business

PRIMARY CYBER EXPOSURE RISK



PROTECTING YOURSELF WITH CEM

According to Gartner, Digital Risk Protection (DRP) solutions accelerate the breadth and depth of protecting digital assets in an organization by significantly improving the ability to act and mitigate the impacts of cyber risks. Through a combination of External Attack Surface Management (EASM) and DRP, XenTegra CEM provides an outside-the-network view of the risks posed to your enterprise. CEM provides contextual threat intelligence that enables organizations to take preemptive actions to avoid or mitigate cyberattacks, eliminating external threats to your organization.

XENTEGRA ADVANTAGES

TAILORED EXPOSURE REPORTS

Ihe CEM reports are custom tailored to provide the most actionable intelligence right up front. For each type of alert, we provide detailed recommended responses and remediation details to jump-start the recovery process.

GUIDED REMEDIATION, ON-DEMAND

Our expert Security Advisor service can be leveraged for guided remediation and interactive security assistance. With XenTegra, you're not alone in maintaining a strong, proactive security posture.

SERVICE BENEFITS

- ✔ Improve the overall security posture of your environment
- ✔ Reduce Mean time To Detect
- ✔ (MTTD) and Remediate (MITA)
- ✔ Early detection of supply chain and third-party exposures
- ✔ Identify exposed or compromised credentials
- ✔ Discover leaked data, information, and trade secret leaks
- ✔ Safeguard employee and client data

COMPREHENSIVE COVERAGE

XenTegra's CEM service hunts for any attributable customer data, a true differentiator from most other market solutions. Our data sources use sophisticated algorithms to hunt beyond the basic domain-based credential leaks and public IP exposure. Data as vague as company, employee, or even customer references can be found and reported on by our Interpol-trusted sources.

GREATER VISIBILITY

We use DRP and EASM to provide increased visibility into key attack surface management vectors that conelate to breaches, including compromised systems, filesharing, open ports, and resources running on internet facing assets. Our CEM service focuses on the distinct coverage of both concepts to provide the leading service In Cyber Exposure Monitoring.

STOP ATTACKS BEFORE THEY HAPPEN

Leaked credentials and sensitive intelligence contribute to successful breaches of networks every single day. XenTegra's CEM service takes a proactive approach so you can identify, prioritize, and manage previously undiscovered enterprise risks. We help you stop the attacks from happening, saving you from the cost of a breach.

SOC 2 Type 2 Certification
Proficio undergoes an annual audit and is in full compliance with the American Institute of Certified Public Accountants (AICPA) controls for Service Organizations. SOC 2 requires companies to establish and follow strict information security policies and procedures, encompassing the security, availability, and confidentiality of customer data. Our audit report is available upon request.
