

NUTANIX DISASTER RECOVERY AS A SERVICE (DRaaS)

XenTegra's Nutanix DRaaS offers a seamless, cloud-integrated disaster recovery solution for your Nutanix environment. By using the same platform for both primary and recovery sites, it eliminates complex translations of data and policies.

- **End-to-End Managed Services:** Outcome-focused full lifecycle DR management—planning, implementation, support & documentation.
- **Security & Compliance Focused:** Meets strict industry regulations with top security and compliance standards.
- **Non-Disruptive Testing:** Test DR readiness without affecting your primary environment.
- **Automatic Test Cleanup:** No work required.
- **Reliable Failback:** Smooth recovery, any direction
- **Partial Failover:** Handle server maintenance or rack failures without downtime.
